			<i>U</i> EUGENE KIM MARY EXAMINER				

Continuation of 5. does NOT place the application in condition for allowance because: examiner still believes that Belec's reference discloses "the envelope conveying arrangment...oriented transversely to the puch in direction", see for example (Fig. 3; via the envelope conveying arrangement via belt 34 is being oriented transversely to the pusher 50 whild it is in it is way between the two rollers). The examiner also believes that raising and lowering feature for roller bar could be automated, since it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art. I re Venner, 120 USPQ 192..
